

Humane Planet Certification

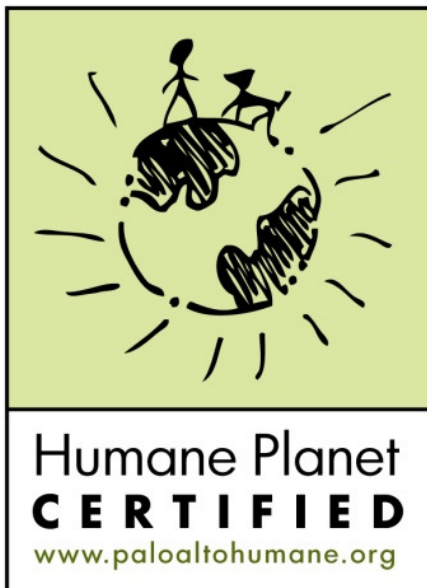

With a worldwide human population of 6.7 billion people, a globalized marketplace, and mega-large agribusiness dominating sustainable business models, the necessity to inform about non-sustainability realities and the dramatic loss of humane practices in animal agriculture is more needed than ever before. Getting back to basics is essential to realizing ethical and planetary balance.

PAHS has launched HUMANE PLANET, a program which aims to educate and aid in creating a more humane community to contribute to the evolution of a more humane planet.

Restaurant and Business Certification to support this pioneering program has been launched!

PAHS acknowledges the following *Humane Planet Certified* partners, which:

- Currently offer exemplary vegetarian and vegan menu options.
- Do not offer veal or foie gras on their menus.
- Are open to expanding vegetarian and vegan menu choices, if they are not already offering only those choices.
- Use local and organic ingredients, which are naturally more humane, whenever possible.
- Use cage-free, free-range and "humane certified" ingredients whenever possible.
